DIGITAL PIANO

The True Touch of a Grand Piano

The CE220 features Kawai's award-winning AWA PROII keyboard action. Utilizing long wooden keys, this action recreates both the weight and movement of our grand piano actions. The AWA PROII action delivers an amazingly authentic piano feel that will satisfy even the most discerning pianist.

Exceptional Sound

The key to the CE220's exceptional sound is Kawai's acclaimed Progressive Harmonic Imaging technology with 88-key piano sampling. Relying on an expanded tonal "database", PHI is capable of recreating the rich, vibrant sound of our 9-foot EX Concert Grand Piano. Plus, with 88-key sampling, each key's unique tonal characteristics are preserved. Thanks to this revolutionary technology, the CE220 contains a remarkable recreation of not only our concert grand piano, but many other popular instrument sounds as well.

Powerful Features

The Kawai CE220 digital piano is packed with dozens of terrific features. For starters, any two sounds can be played together in a layered or split keyboard mode. A built-in Metronome teaches a steady sense of rhythm while two headphone jacks provide for silent practice.

USB to Device functionality lets you play and record MIDI files using a USB memory stick. Virtual Voicing and Brilliance controls allow you to mold the sound to your personal taste, while User Touch can tailor the keyboard's "feel" to your unique playing style. There's even built-in prerecorded classical Piano Music (with songbook) for your listening and learning pleasure.

The Kawai CE220... the perfect blend of great tone and touch, terrific features and a gorgeous cabinet in an elegant Premium Satin Black finish.
